

## **RESPONSIBLE GAMING**

### **POLICY SUMMARY**

The Stars Group promotes responsible gaming for both its customers and employees. All of our employees receive a mandatory yearly training where they learn about how to recognize signs often associated with gambling related problems. This training provides the necessary knowledge for employees to identify amongst many other aspects the potential behavioral, verbal and emotional characteristics that may indicate that an individual (either personnel or customer) may be at risk of developing a gambling related problem. We are engaged in a highly regulated gaming industry. Regulatory authorities provide clear standards or objectives around social responsibility, requiring gaming operators to protect customers who may be at risk of the potential negative effects of gambling. Our Responsible Gaming Policy and related processes are designed to ensure compliance with all applicable regulatory and best practice requirements related to responsible gaming.
